

Paper Plate Thanksgiving Turkey Wreath

Supplies Needed:

- paper plate
- brown paint
- paintbrush
- construction paper
- googly eyes
- red water balloon
- scissors
- glue
- stapler

Directions:

1. Start by cutting out the center circle of your paper plate. Paint the rim of the plate with your brown paint. Set it aside to dry completely.
2. While your paint is drying, cut out a circle from brown construction paper for your turkey head and an orange beak. Then several strips of colored construction paper for turkey feathers.
3. Glue (or staple) your turkey face onto the bottom of your paper plate. Glue your googly eyes, red water balloon and beak onto your turkey face.
4. Finish your paper plate Thanksgiving turkey wreath by folding the paper feather strips around the top of the paper plate and staple them in place. Now you can hang your cute turkey wreath on your doorknob or on a hook on a mantel.
